Pantoprazole (E.C.) I.P. 40mg + Cinitapride (S.R.) I.P. 3mg  
Tablets

- ✓ Pantoprazole is a proton pump inhibitor (PPI). It works by reducing the amount of acid in the stomach which helps in the relief of acid-related indigestion and heartburn.
- ✓ Cinitapride is a prokinetic which facilitates the movement of intestines, thereby increasing the frequency of bowel movements, softening stools, and reducing abdominal pain/discomfort.
