

Viloflox

Ofloxacin I.P. 0.3% w/v + Benzalkonium Chloride I.P. 0.02% w/v Eye & Ear

Ofloxacin

- Does not produce toxic effects on the corneal epithelium ophthalmic.
- Has the best aqueous penetration in human eyes, as compared with ciprofloxacin and tobramycin, which suggests that ofloxacin could be preferred topical medicine for the prevention and treatment of endophthalmitis.

Benzalkonium Chloride

Benzalkonium Chloride works as a preservative by preventing the growth of harmful microorganisms. This helps prolong the shelf life of medicines.

Indications:

Post-operative infections

Dacryocystitis

Conjunctivitis

Keratitis
