Sulfavil 500

Sulfasalazine 500mg **TABLETS**

- ✓ Sulfasalazine is used to reduce inflammation and pain in rheumatoid arthritis (RA), juvenile rheumatoid arthritis (JRA), and ulcerative colitis (UC).
- ✓ It works by suppressing the overactivity of the immune system in autoimmune diseases and blocks the chemical messengers that cause inflammation (swelling).
- ✓ Sulfasalazine is also used to treat and prevent acute attacks of mild to moderate ulcerative colitis. It works inside the bowels by helping to reduce the inflammation and other symptoms of the disease.
- ✓ Sulfasalazine is a Disease Modifying Anti-Rheumatoid Drug (DMARD).
- ✓ Also used to decrease pain and swelling in the joints.
